

Ioxus REACH Declaration

3/26/2021

Dear Valued Customer,

Systematic Power Manufacturing, LLC, DBA Ioxus (Ioxus) is committed to providing our customers with the information needed to support the use of our products worldwide. The European Regulation 1907/2006 on Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) entered into force on June 1st, 2007. REACH is intended to ensure protection of both human health and the environment from the risks posed by chemicals.

This legislation has significant impact on manufacturers, importers and downstream users in the EU. Registration is required for chemical substances, preparations and articles with an intended release of substances. As a supplier not located within the EU, Ioxus supports this initiative by providing certain information regarding the hazards of substances used to ensure compliance.

Registration:

Ioxus does not manufacture chemical substances, preparations or articles that intentionally release substances under normal operating conditions. As such, Ioxus does not have any plans for registration or pre-registration of our products under the REACH Legislation. Although Ioxus is not required to register under REACH, Ioxus and its supply chain are committed to meeting the communication needs of our customers to support REACH Compliance.

Restriction of Chemicals – Annex XVII:

Annex XVII of the REACH Legislation provides restrictions on hazardous substances in preparations or articles that present risks to human health or the environment. These restrictions cover manufacturing, sale and use of substances and cover a wide variety of applications. Ioxus products do not include substances listed in REACH Annex XVII, dated June 26, 2009.

Substances of Very High Concern (SVHC) – Annex XIV:

As of January 19, 2021, the European Chemicals Agency (ECHA) has placed 211 substances in the Candidate list of Substances of Very High Concern for Authorization. Any SVHC must not be used, manufactured or imported without the prior authorization of

the ECHA. The candidate list will be updated and published periodically by ECHA as more substances are identified as SVHC.

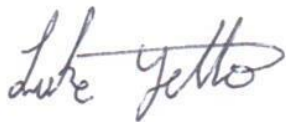

Ioxus declares that our products are not intentionally manufactured or formulated with compounds and substances above the 0.1% threshold by weight specified by the REACH "Candidate List of Substances of Very High Concern for Authorization" dated January 19, 2021.

This determination is based on information from our supply chain which we believe to be true and accurate.

Product users are responsible for determining the applicability of REACH and other related environmental regulations based on their individual usage of the final product.

For any questions regarding this declaration, please contact lyetto@ioxus.com.

On behalf of Ioxus,

A handwritten signature in black ink that reads "Luke Yetto".
